Cloud Security Engineer (m/f)

Full time, Halle (Saale)

Who we are:

With more than 20 years of experience as well as a vast number of successful national and international projects HMS is known as a leading operator of entire integrated media ecosystems. As a new member of the Qvest Media group, a world-leading systems architect and ICT integrator in the fields of broadcasting and media technology, HMS is now set to expand its international activities, development projects and team of experts. Join us now and let us grow together!

What we need you for:

You are working on our future cloud products for worldwide media, broadcast and sports clients and help us to improve every part of it: from user experience and well architected backend to performance.

Your main focus:

- Integrate security and data privacy standards
- Secure cloud development and delivery process
- Provide standardized offering to facilitate ongoing security and compliance within application stacks and our cloud ecosystem

- Focus on continuously improving the security of customer solutions
- Develop and administrate Identity and Access Management (IAM) solutions
- Create authentication and authorization data flows

This is our tech stack:

- Kubernetes, Istio, Concourse, Harbor, Git, Vault, BOSH, MEAN, ELK

- Cloud Providers: AWS, Azure

Your profile to fit in:

- Academic degree or equivalent professional qualification
- Minimum 2+ years of professional IT experience including cloud security
- Knowledge of the EU General Data Protection Regulation is important
- Experience in designing secure complex distributed systems
- Practical experience in the fields of cloud architectures, solutions and security
- Knowledge about data interfaces in IAM and directory services (AD/LDAP)
- Confidence in handling state-of the art web technologies and corresponding deployment

Your bonus qualifications:

- Experience in pentesting and cryptography
- Understanding of compliance issues (ISO 29100, international privacy requirements, regulatory opinions, ISO 27001/2)
- Security certifications (e.g. OSCP, OWASP) are a plus
- Experience in Git, open pull requests, working with branches, making review, fixing conflicts
- Experience in Agile software development principles
- Pro-active attitude, team-oriented and excellent analytical and problem solving skills
- Good English is mandatory and solid understanding of German language

---

What you can expect from us:

- ✓ A successful globally operating media technology company
- ✓ Excellent development opportunities
- ✓ Exciting projects with future-oriented topics
- ✓ Excellent working atmosphere and a great team of experts
- ✓ Flat hierarchies in an exciting and vital work environment
- ✓ Flexible working hours
- ✓ Opportunities to implement and develop your ideas, concepts and profile
