

# Full Stack Web Developer - API Management (m/f) Full time, Halle (Saale)

## Who we are:

With more than 20 years of experience as well as a vast number of successful national and international projects HMS is known as a leading operator of entire integrated media ecosystems. As a new member of the Qvest Media group, a world-leading systems architect and ICT integrator in the fields of broadcasting and media technology, HMS is now set to expand its international activities, development projects and team of experts. Join us now and let us grow together!

## What we need you for:

You are working on our future cloud products for worldwide media, broadcast and sports clients and help us to improve every part of it: from user experience and well architected backend to performance. With your deep knowledge of modern web service technologies you are not only key to develop and improve our code base but you are also welcome to bring in suggestions for improving our cloud services.

### Your main focus:

- ▶ Development, documentation, testing and deployment of our internal cloud API services
- ▶ Take care of integrating external APIs
- ▶ Design & implement an API Gateway for the provisioning & management of API Endpoints
- ▶ Develop pluggable service components on our API layer

### This is our tech stack:

- ▶ Languages: TypeScript, JavaScript, HTML5, CSS
- ▶ Tools & Frameworks: Angular, Node.js, Express, ArangoDB, Bootstrap, Swagger, Docker, Kubernetes, Git, Bash

### Your profile to fit in:

- ▶ Academic degree or equivalent professional qualification
- ▶ Minimum 2+ years of focused, hands-on development experience, full stack developer
- ▶ Expert in web development with TypeScript, JavaScript, especially Angular 2+ and higher, Node.js
- ▶ Deep experience in the conception and development of REST and GraphQL API interfaces
- ▶ Development across the entire API lifecycle, from design to documentation to test and deployment
- ▶ Good experience in integration patterns and API management tools and infrastructure

### Your bonus qualifications:

- ▶ Good knowledge in API definition languages (e.g. OpenAPI, Swagger)
- ▶ Good data modelling know-how of different database technologies
- ▶ Good experience with containerized architectures (e.g. Docker), management tools (e.g. Kubernetes) and the microservice architecture pattern
- ▶ Experience in Git, open pull requests, working with branches, making review, fixing conflicts
- ▶ Good English is mandatory and solid understanding of German language

### What you can expect from us:

- ✓ A successful globally operating media technology company
- ✓ Excellent development opportunities
- ✓ Exciting projects with future-oriented topics
- ✓ Excellent working atmosphere and a great team of experts
- ✓ Flat hierarchies in an exciting and vital work environment
- ✓ Flexible working hours
- ✓ Opportunities to implement and develop your ideas, concepts and profile
